SWINE INFLUENZA

A GUIDE TO PREVENTION

Swine Influenza (swine flu) is a respiratory disease caused by type A influenza viruses that causes regular outbreaks in pigs. People do not normally get swine flu, but human infections can and do happen. Swine flu viruses have been reported to spread from person-to-person, but in the past, this transmission was limited and not sustained beyond three people.

There are many everyday actions people can take to stay healthy. Such as:

- * Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it.
- * Wash your hands often with soap and water, especially after you cough or sneeze. Alcohol based waterless hand sanitizers, e.g. Purell.
- * Avoid touching your eyes, nose or mouth. Germs spread that way.
- * Disinfecting commonly-touched surfaces including computer keyboards light switches, coffee pot handles and phones will help reduce the potential for cross-contamination.
- * Do not share personal items....towels, combs, brushes etc.

Action Unlimited News

(MAY 2009)

Here at Action Unlimited Resources we always strive to bring quality and environmentally friendly products to the attention of our customers, and we continue to do our part with the introduction of our new paper line. Cascades North River is one of the most complete lines of superior quality recycled tissue paper products on the market. North River® not only exceeds the most stringent environmental standards, but is also certified by the largest number of organizations in the industry.

Cascades Tissue Group's North River® products exceed the high standards of the EPA and the CFPA and are certified by other North American environmental organizations, including: Green Seal, Environmental Choice Program (EcoLogo), Green Restaurant Association, and the most impressive certification: Processed Chlorine Free. Cascades Tissue Group is the only producer of tissue paper products to comply with the stringent requirements of the SMMI (Sustainable Manufacturing & Marketing Initiative) guidelines and to have PCF certification (Processed Chlorine Free). This certification ensures a chain of custody for all fibers and the delivery of products that are manufactured from sustainable raw materials according to a chlorine free process. Cascades Tissue Group even exceeds CFPA standards in its North River® product line, which is made of 100% recycled fibers and contains up to 100% post-consumer fibers.

This paper line is focused on making quality products that meet your needs and preserve the environment. Action is very proud to offer this superior quality and environmentally safe product to all of our customers. For more information or to set up a presentation you can get in touch with Action today.
